

Your Name

Electronics Engineer

yourname@email.com · +62 812-3456-7890 · Semarang, Indonesia · linkedin.com/in/yourname

PROFILE

Electronics Engineer with expertise in embedded systems, PCB design, and power electronics. Experienced in taking hardware from concept to production, including schematic capture, PCB layout, firmware development, and test validation. Passionate about low-power IoT systems and precision analog design.

EXPERIENCE

Electronics Engineer

PT. Tech Solutions Indonesia | 2024 – Present

Lead hardware design for embedded IoT products. Responsible for PCB layout, firmware architecture, and production testing protocols. Reduced board re-spin rate by 40%.

Junior Electronics Engineer

PT. Industri Elektronika Nusantara | 2022 – 2024

Supported R&D; in designing and validating power electronics boards. Conducted EMC pre-compliance testing. Contributed to 3 commercial product launches.

Electronics Intern

Balai Besar Teknologi Industri | 2021 – 2022

Developed microcontroller-based automation systems. Wrote firmware for sensor acquisition and data visualization in Python.

EDUCATION

Bachelor of Electronics Engineering — GPA 3.75 / 4.00

Universitas Diponegoro, Semarang | 2018 – 2022

Thesis: Design and Implementation of Wireless Sensor Node for Structural Health Monitoring using LoRa Technology.

SKILLS

Hardware	PCB Design (KiCad, Altium) · Schematic Capture · LTSpice · Analog & Digital Electronics · Power Electronics
Firmware	STM32 · ESP32 · AVR · FreeRTOS · C/C++ · I2C / SPI / UART / CAN · Sensor Integration
Signal	Filter Design · FFT Analysis · MATLAB/Simulink · ADC/DAC Systems · RF Basics
Tools	Oscilloscope · Logic Analyzer · Python · Git · LabVIEW · SolidWorks

SELECTED PROJECTS

Wireless Sensor Network for Industrial Monitoring

ESP32 · FreeRTOS · MQTT · PCB Design · Python

Mesh-topology WSN for real-time factory environment monitoring.

Custom BLDC Motor Controller

STM32 · Gate Driver · FOC Algorithm · Altium · C

3-phase BLDC controller with FOC. 96% efficiency at rated load.

Low-Power IoT Environmental Logger

LoRa SX1276 · ATmega328P · Solar MPPT · KiCad

Solar-charged LoRa data logger with 2-year battery life in sleep mode.
